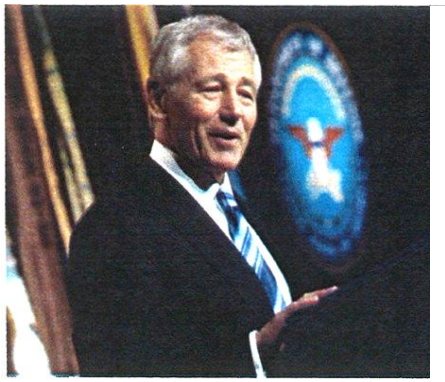
QUESTIONS / DISCUSSION

"Difficult Choices"



- "We seek a highly ready and capable Army, able to dominate any opponent across the full spectrum of operations . . .
- We chose further reductions in troop strength and force structure in every military service – active and reserve – in order to sustain our readiness and technological superiority, and to protect critical capabilities like Special Operations Forces and cyber resources.
- We chose to terminate or delay some modernization programs to protect higher priorities in procurement, research, and development.
- And we chose to slow the growth of military compensation costs in ways that will preserve the quality of the all-volunteer force, but also free up critical funds needed for sustaining training, readiness, and modernization."
