

## **Answer to DCIPS Performance Objective Exercise From the June Issue of the EYE**

### **Work Activity #1: Collection Analyst**

Options A, B, and C are general work activities that describe some of the important tasks for a Collection Analyst. Option D is a performance objective because it provides a specific result associated with the work activities (i.e., develop one data repository).

### **Work Activity #2: Computer Engineer**

Options A, C, and D are general work activities that describe some of the important tasks for a Computer Engineer. Option B is a performance objective because it provides a specific result associated with the work activities (i.e., develop and recommend one alternative process or long-term solution).

### **Work Activity #3: Open Source Officer**

Options, B, C, and D are general work activities that describe some of the important tasks for an Open Source Officer. Option A is a performance objective because it provides a specific result associated with the work activities (i.e., implement two new coverage areas).
